Computer security, cybersecurity or information technology security (IT security) is the protection of computer systems from theft or damage to their hardware, software or electronic data, as well as from disruption or misdirection of the services they provide.. The field is growing in importance due to increasing reliance on computer systems, the Internet and wireless networks such as ...

Computer security - Wikipedia

Computer science is the study of processes that interact with data and that can be represented as data in the form of programs.It enables the use of algorithms to manipulate, store, and communicate digital information.A computer scientist studies the theory of computation and the practice of designing software systems.. Its fields can be divided into theoretical and practical disciplines.

Computer science - Wikipedia

Get as many processing cores as you can, but do not do so in expense of processor speed. Make sure your computer has processors that are 3.2 to 3.4 Ghz or even higher (the faster the better).

The RAS Solution: Optimizing Your Computer for Fast HEC

NoSuchCon is a three-days-long conference set up by volunteer members through a non-profit organization. The project is the offspring of well-known people of the cybercommunity, people used to international IT security conferences and, up-until-then, of organizers of Hackito Ergo Sum.

NoSuchCon

In this paper, we will focus on an efficient deep neural network architecture for computer vision, codenamed Inception, which derives its name from the Network in network paper by Lin et al [12]
