corporate finance first european pdf

NBER's Program on Corporate Finance. concentrates on the causes and effects of financing arrangements used by corporations. The group also studies corporate governance, relations between banks and corporations in different countries, and the effects of leveraged buyouts on profits, spending on research and development, and employment.

NBER's Program on Corporate Finance

Finance is a field that is concerned with the allocation of assets and liabilities over space and time, often under conditions of risk or uncertainty. Finance can also be defined as the art of money management. Participants in the market aim to price assets based on their risk level, fundamental value, and their expected rate of return. Finance can be split into three sub-categories: public ...

The word "corporation" derives from corpus, the Latin word for body, or a "body of people". By the time of Justinian (reigned 527–565), Roman law recognized a range of corporate entities under the names universitas, corpus or collegium. These included the state itself (the Populus Romanus), municipalities, and such private associations as sponsors of a religious cult, burial clubs, political ...

This study examines the relationship between board gender diversity and corporate environmental violations. Drawing on gender socialization and diversity theories, greater female board representation and female chief executive officers (CEO) are expected to reduce the frequency of corporate environmental violations.

Are women greener? Corporate gender diversity and

Solvay adheres to the highest corporate governance standards. As such, the company has issued a Corporate Governance

Charter.. This charter is based on the values that are historically ingrained in our culture.

The Alliance for Corporate Transparency project analyses how European companies disclose information necessary for understanding their impact on society and the environment, as required by the EU Non-financial Reporting Directive.

Alliance for Corporate Transparency | ACFT

In this paper, we argue that personal characteristics of CEOs in large corporations lead to distortions in corporate investment policies. In particular, we study the investment decisions of CEOs who overestimate the future returns of their companies, measured by a failure to divest company-specific risk on their personal accounts.
