IHS Markit is your source for US and international engineering and technical standards, specifications, codes, and training materials in hardcopy or PDF download.

Individual Standards in hardcopy and PDF download | IHS

Ceramic engineering is the science and technology of creating objects from inorganic, non-metallic materials. This is done either by the action of heat, or at lower temperatures using precipitation reactions from high-purity chemical solutions.

Ceramic engineering - Wikipedia

Hierarchical cellular solids including honeycomb, foam, and lattice solids that are strong, lightweight; materials with structural hierarchy, buckling, honeycomb, strength to weight ratio, compact bone, foam; hierarchical structure, in recent parlance analyzed via multiscale modeling. In recent years hierarchical lattices have been made via 3D printing, rapid prototyping, and related methods.

Materials with structural hierarchy

The vacuum-dehydration technology has the merits of low operation temperature, high dehydration efficiency (Parikh, 2015) and good uniformity of dehydration (Rouette, 2001b). Unlike the vacuum ...

(PDF) Vacuum Drying: Basics and Application - ResearchGate

Carbon nanotubes (CNTs) are allotropes of carbon with a cylindrical nanostructure. These cylindrical carbon molecules have unusual properties, which are valuable for nanotechnology, electronics, optics, and other fields of materials science and technology. Owing to the material's exceptional strength and stiffness, nanotubes have been constructed with a length-to-diameter ratio of up to ...

Carbon nanotube - Wikipedia

Review on thermal energy storage with phase change: materials, heat transfer analysis and applications

Review on thermal energy storage with phase change

The idea of using iron–resin composites for soft magnetic applications is not new. It appeared more than 100 years ago but iron–resin composites have been rarely used because their properties, the processing technology for making parts and real needs for these materials were not sufficiently developed.
