An algorithm for fast calculation of short circuit forces

In electrical and electronic systems, reactance is the opposition of a circuit element to a change in current or voltage, due to that element's inductance or capacitance.The notion of reactance is similar to electrical resistance, but it differs in several respects.. In phasor analysis, reactance is used to compute amplitude and phase changes of sinusoidal alternating current going through a ...

The telegrapher's equations (or just telegraph equations) are a pair of coupled, linear differential equations that describe the voltage and current on an electrical transmission line with distance and time.The equations come from Oliver Heaviside who in the 1880s developed the transmission line model.The model demonstrates that the electromagnetic waves can be reflected on the wire, and that ...
