Action MACH . A spatio-temporal maximum average correlation height filter for action recognition. PDF. Introduction. In this project, we introduce the Action MACH filter, a template-based method for action recognition which is capable of capturing intra-class variability by synthesizing a single Action MACH filter for a given action class.

Action Recognition — Mikel Rodriguez

Reservoir simulation is an area of reservoir engineering in which computer models are used to predict the flow of fluids (typically, oil, water, and gas) through porous media

Reservoir simulation - Wikipedia

One of the techniques for the removal of Cu 2+ from water and wastewaters is adsorption and special attention has been focused on biosorption. Compared to the conventional method, adsorption today is the most suitable method for removing pollutants from wastewater.

A review on adsorbents for treatment of water and

In probability theory, the multi-armed bandit problem (sometimes called the K-or N-armed bandit problem) is a problem in which a fixed limited set of resources must be allocated between competing (alternative) choices in a way that maximizes their expected gain, when each choice's properties are only partially known at the time of allocation, and may become better understood as time passes or ...

Multi-armed bandit - Wikipedia

ImBatch is a free multithreaded image processing tool for your Windows PC. With the help of ImBatch, users can perform a variety of complex image editing tasks; applying those changes to hundreds of images at once.

As of August 29, 2014, Google has decided to intentionally break old browsers. They say it's not a bug, it's by design here, even though Google's support page says it accepts Safari 4 as a fully supported browser. If you want Google searches to go back to the modern style, you need to change your User-Agent string.
