SCADA SYSTEMS TEXT2 - Process-Logic

Literate programming is a programming paradigm introduced by Donald Knuth in which a program is given as an explanation of the program logic in a natural language, such as English, interspersed with snippets of macros and traditional source code, from which a compilable source code can be generated.. The literate programming paradigm, as conceived by Knuth, represents a move away from writing ...

Literate programming - Wikipedia

In functional programming, a monad is a design pattern that allows structuring programs generically while automating away boilerplate code needed by the program logic. Monads achieve this by providing their own data type, which represents a

specific form of computation, along with one procedure to wrap values of any basic type within the monad (yielding a monadic value) and another to compose ...

SELECT INTO []. Select into takes the values name, address and phone number out of the table employee, and places them into the variables v_employee_name, v_employee_address, and v_employee_phone_number.. This only works if the query matches a single item. If the query returns no rows it raises the NO_DATA_FOUND built-in exception. If your query returns more than one row, Oracle raises the ...

Introduction What is Prescriptive Analytics? “Prescriptive analytics is the application of logic and mathematics to data to specify a preferred course of action. While all types of analytics ultimately support better decision making, prescriptive analytics outputs a decision rather than a report, statistic, probability or estimate of future outcomes.”
