A swimming pool, swimming bath, wading pool, or paddling pool is a structure designed to hold water to enable swimming or other leisure activities. Pools can be built into the ground (in-ground pools) or built above ground (as a freestanding construction or as part of a building or other larger structure), and are also a common feature aboard ocean-liners and cruise

ships.

Evaporator Coil Air Handler Unit Heater Product Guide

History. District heating traces its roots to the hot water-heated baths and greenhouses of the ancient Roman Empire. Usually, a hot water distribution system in Chaudes-Aigues in France is regarded as the first real district heating system. It used geothermal energy to provide heat for about 30 houses and started operation in the 14th century.

The AM Series high efficiency water heaters are powerful hot water systems with compact footprints and built-in redundancy. The AM Variable Radial Circulation heat exchanger is highly resistant to scale build-up which increases your ROI, expands the lifetime expectancy of your system and promotes uptime reliability.

AM Series Water Heaters | AERCO

The AM Series of commercial condensing boilers are essentially pre-packaged boiler plants. Each unit consists of between two and four individual modules, each with its own combustion chamber, burner, gas valve, and combustion controls and safeguards, all tied together to common water connections and assembled in a single enclosure.
